

REST API Testing – Jira Bug Reports

Project 2 • Manual API Testing • Postman • Jira

Bug Summary

Bug ID	Module	Priority	Status	Description
RAT-1	Orders	Medium	Open	Created order cannot be retrieved using returned Order ID
RAT-2	Users	Medium	Open	Deleted user is still accessible through Get User API
RAT-3	Users	Medium	Open	Created user cannot be retrieved using returned User ID
RAT-4	Products	Medium	Open	Created product cannot be retrieved using returned Product ID
RAT-5	Products	Medium	Open	Updated product changes are not persisted
RAT-6	Products	Medium	Open	Deleted product is still accessible through Get Product API

RAT-1 – Created order cannot be retrieved using returned Order ID

Field	Details
Issue Type	Bug
Module	Orders
Severity	Medium
Priority	Medium
Status	Open
API Flow	POST /api/v1/orders → GET /api/v1/orders/41
Precondition	API environment is available.
Steps to Reproduce	Create a valid order and note returned ID 41; then GET /orders/41.
Actual Result	POST returned 201 with ID 41, but GET returned 404 NOT_FOUND.
Expected Result	The created order should be retrievable using the returned ID.

RAT-2 – Deleted user is still accessible through Get User API

Field	Details
Issue Type	Bug
Module	Users
Severity	Medium
Priority	Medium
Status	Open
API Flow	DELETE /api/v1/users/1 → GET /api/v1/users/1
Precondition	API environment is available.
Steps to Reproduce	Delete User ID 1; then GET /users/1.
Actual Result	DELETE returned 204, but GET still returned the user with 200.
Expected Result	GET for a deleted user should return 404 NOT_FOUND.

RAT-3 – Created user cannot be retrieved using returned User ID

Field	Details
Issue Type	Bug
Module	Users
Severity	Medium
Priority	Medium
Status	Open
API Flow	POST /api/v1/users → GET /api/v1/users/51
Precondition	API environment is available.
Steps to Reproduce	Create a valid user and note returned ID 51; then GET /users/51.
Actual Result	POST returned 201 with ID 51, but GET returned 404.
Expected Result	The created user should be retrievable using the returned ID.

RAT-4 – Created product cannot be retrieved using returned Product ID

Field	Details
Issue Type	Bug
Module	Products
Severity	Medium
Priority	Medium
Status	Open
API Flow	POST /api/v1/products → GET /api/v1/products/61
Precondition	API environment is available.
Steps to Reproduce	Create a valid product and note returned ID 61; then GET /products/61.
Actual Result	POST returned 201 with ID 61, but GET returned 404.
Expected Result	The created product should be retrievable using the returned ID.

RAT-5 – Updated product changes are not persisted

Field	Details
Issue Type	Bug
Module	Products
Severity	Medium
Priority	Medium
Status	Open
API Flow	PUT /api/v1/products/1 → GET /api/v1/products/1
Precondition	API environment is available.
Steps to Reproduce	Update Product ID 1 with valid changed values; then retrieve it.
Actual Result	PUT response showed updated values, but subsequent GET returned different data.
Expected Result	Updated values should persist and be returned by GET.

RAT-6 – Deleted product is still accessible through Get Product API

Field	Details
Issue Type	Bug
Module	Products
Severity	Medium
Priority	Medium
Status	Open
API Flow	DELETE /api/v1/products/1 → GET /api/v1/products/1
Precondition	API environment is available.
Steps to Reproduce	Delete Product ID 1; then GET /products/1.
Actual Result	DELETE returned 204, but GET still returned the product.
Expected Result	GET for a deleted product should return 404 NOT_FOUND.
